-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on _____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11; 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above, claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claims _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are objected to by the Examiner.
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. § 119

- 13) ☐ Acknowledgement is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d).
- a) ☐ All b) ☐ Some* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- *See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e).

Attachment(s)

- 15) ☒ Notice of References Cited (PTO-892) 18) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 16) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948) 19) ☐ Notice of Informal Patent Application (PTO-152)
- 17) ☒ Information Disclosure Statement(s) (PTO-1449) Paper No(s). 2 20) ☐ Other:

Serial Number: 10/063, 900

Art Unit: 2855

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 - 4, 6 - 9, 11 - 13 and 15 - 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Gerhardt et al.

Regarding claims 1 - 3, 8, 9, 13 and 17, Gerhardt et al disclose a method and apparatus for stabilizing an intake air flow of a ground-based turbine engine comprising a gas turbine engine 5 of an aircraft (See Col. 1, lines 21 - 23), the gas turbine engine having an inlet 1, operating the engine 5 by selecting a power setting for the engine that is capable of producing a vortex between the inlet 1 and a tarmac 3, placing a removable object 6 between the inlet and the tarmac 3 (See Col. 4, lines 41- 58) and inhibiting formation of a vortex.

Regarding claim 4, altering a supply of air to a portion of the inlet 1 adjacent the tarmac 3 (See Col. 5, lines 23 - 28).

Regarding claims 6, 11 and 15, the engine of the aircraft remains static on the tarmac 3 while testing the engine through the usage of supports 7' (See Col. 4, lines 56 - 58, See Fig. 2A).

Regarding claims 7, 12 and 16, operating the engine 5 at an elevated engine

pressure ratio, wherein, without the object, operating the engine at the threshold EPR would not create an inlet vortex and operating the engine at the elevated EPR would create the inlet vortex and the power setting and the EPR includes a full power setting level (See Cols. 5 and 6, lines 53 - 61 and 15 - 25).

Regarding claims 18 - 20, a base 7 faces the tarmac 3, an inclined surface 8, 9 extends in a direction from the tarmac towards the inlet (See Fig. 3) and a portable suppressor prevents formation of the vortex (See Col. 6, lines 6 - 14).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5, 10 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gerhardt et al in view of Schafhaupt et al.

Regarding claims 5, 10 and 14, Gerhardt et al lack the engine being located on a wing of the aircraft. However, Schafhaupt et al disclose an apparatus for diminishing intake vortexes in jet engines comprising an engine 7 comprised of a turbo -compressor situated on a wing of an aircraft 1 (See Col. 2, lines 61 - 64, See Fig. 1). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Gerhardt et al according to the teachings of Schafhaupt et al for the purpose of, diminishing intake vortexes in jet engines

utilizing a grating with short, vertically extending wind tunnels disposed near the ground below and directly in front of the engine inlet (See Schafhaupt et al, Col. 2, lines 1 - 13).

5. Any inquiry concerning this communication should be directed to Examiner Octavia Davis at telephone number (703) 306 - 5896. The examiner can normally be reached on Monday - Thursdays (9:00 - 5:00), Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Lefkowitz, can be reached on (703) 305 - 4816. The fax phone number for the organization where this application or proceeding is assigned is (703) 746 - 4409.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308 - 0956.
